## COMPANY

The manufacturing company Ukrainian Chemical Technologies LLC is a dynamically growing multi-profile Ukrainian company to develop and manufacture detergents and disinfectants. Working on the Ukrainian market since 2000, the Company has established its professional reputation in many industries, while the constant development and modernization of the manufacturing facilities every year attracts more and more customers to our Company.

The Company is specialized in the manufacturing of detergents of wide use and monitors the complete manufacturing cycle. The manufacturing is equipped with all the necessary equipment for control of the used raw materials, management of the manufacturing process, packaging and packing of finished products and final quality control. The enterprise has introduced a quality management system in accordance with the international standard ISO 9001:2015. The company pays special attention to quality control at each stage of the manufacturing cycle, from the selection of raw materials to the product quality testing. We are constantly improving the manufacturing processes reliant on the development of new products. Most of professional detergents are available in a highly concentrated form. Application of a detergent requires preparation of a working solution in accordance with the recommendations for use.

Since its foundation, the company Ukrainian Chemical Technologies LLC has paid constant attention to the development of the products suitable for different equipment, to each consumer and any climatic conditions. All of these has been and is possible due to the continuous activity of the certified research laboratory that is the mainstay of the enterprise.

## COMPANY BASIC FACTS

*Choosing the Company as a client  
means giving preference to the service and quality  
of European standard*

### 1 PROFILE

Ukrainian Chemical Technologies LLC is a multi-profile company focused on the development and manufacturing of detergent chemicals and disinfectants and operating on the market since the year 2000

### 2 AIM

The Company is striving to maximally meet the customer needs and shaping up a mutually beneficial environment for long-term collaboration

### 3 SUCCESS FACTORS

In its work the Company is oriented on the four key success factors:

- Customized approach
- Scientific and research center
- Modern production
- Product quality guarantee

## COMPANY SUCCESS FACTORS

*Choosing the Company as a client  
means giving preference to the service and quality  
of European standard*

### CUSTOMIZED APPROACH

Chemical technologists develop customized detergents and disinfectants in line with the customer needs.

Technical experts set up dosing systems, train on the proper use of the detergents and disinfectants.

### SCIENTIFIC AND RESEARCH CENTER

Our R&D center has modern analytical equipment for research and development of new types of products. Here, highly qualified technologists-developers work on the creation of new products that will be manufactured at our production.

We actively cooperate with global manufacturers of raw materials and already have honorable awards for developments from the world leader BASF.

### MODERN PRODUCTION

The manufacturing capacity exceeds 10,000 tons. Manufactured are over 400 types of products. The total space of the production shops is more than 5,000 m<sup>2</sup>.

All manufacturing processes are aided by high-quality equipment, which enables providing high accuracy at chemical dosing. Filling mixers with components and their mixing is carried out under a clear program. Significant attention is given to the quality of the water, which undergoes a number of purification stages.

### PRODUCT QUALITY GUARANTEE

The enterprise has introduced a quality management system in accordance with the international standard ISO 9001:2015.

The Company pays special attention to quality control at each stage of the manufacturing cycle, from the selection of raw materials to product quality testing.

## COMPANY PRODUCT QUALITY GUARANTEE

*Choosing the Company as a client  
means giving preference to the service and quality  
of European standard*

### INTERNATIONAL QUALITY STANDARDS

The enterprise has introduced a functioning quality management system in line with the requirements of the ISO 9001:2015 international standard.

### INDUSTRIAL EXPERIENCE

The many-year research has enabled to design a series of products which meet all the client's needs and includes both regular as well as exclusive chemicals.

### QUALITY CONTROL LABORATORY

A certified laboratory is in control of the quality parameters at each manufacturing cycle from raw material selection to ready product testing.

means giving preference to the service and quality  
of European standard*

Certificates of compliance with  
the requirements of international  
ISO standards:

ISO 9001:2015

"Quality management systems"

ISO 14001:2015

"Environmental management systems"

ISO 22000:2018

"Food safety management systems"

Certificate of compliance of products  
with canonical Islamic norms Halal

## PRODUCTS

*Choosing the Company as a client  
means giving preference to the service and quality  
of European standard*

### AUTOMOTIVE COSMETICS

The professional automotive chemicals under **VENOR**® trade mark have been developed and are manufactured with an eye on advanced technologies and includes a whole line of product directions designed for automobile operation and maintenance.

The **VENOR**® – series is comprised of: automobile shampoos, active foam for touchless wash, shampoos for portal car wash, waxes and polishes, car care products, automobile fluids and other chemicals.

### NUTRITION INDUSTRY

The detergents and disinfectants under the **OXIN**® i **CHISTO-PROM**® trade mark have been specifically developed by our experts for enterprises of the nutrition industry.

Prevention of the possible hazards affecting the nutritive production and caused by germs as well as maintaining its high sanitary standards are aided by the **CHISTO-PROM**® i **OXIN**® detergents and disinfectants.

**OXIN**®  
**CHISTO-PROM**®

### WATER TREATMENT

The **AQUASEPT**® concentrated professional chemicals are designed for swimming pool cleaning, water treatment and water-based cleaning of industrial facilities.

The **AQUASEPT**® chemical series is comprised of: swimming pool cleaning chemicals and disinfectants, steam boiler and heating network water treatment chemicals, biocides and dispersants, reverse flow cooling system water treatment, reverse Osmosis system chemicals.

# PRODUCTS

*Choosing the Company as a client means giving preference to the service and quality of European standard*

## WOOD PRESERVING CHEMICALS

The **WOODMIX**® preserving chemicals are used to preserve wood and at timber shipping, pallet chemical treatment. The chemicals have a broad range of preserving and fungicidal features – anti-mold, anti-yeasts, anti-fungus, anti-insect, anti-bug, anti-wood borer, anti-bacteria, anti-pest.

## DISINFECTANTS

The disinfectants are designed for current and final disinfection at enterprises, in medicine, public places and everyday life.

The disinfectants series under **SEPTOFAN**®, **DEZMARK**®, **BAREKSAN**® trade mark is comprised of: alcohol hand antiseptics, disinfectants for various kinds of surfaces and medical instruments.

**SEPTOFAN**®  
**DEZMARK**®  
**BAREKSAN**®

## CONSUMER CHEMICALS

The consumer chemicals under **BALU**® and **LILU**® brands have been developed and are manufacturing with an eye on advanced technologies and include a whole line of product directions designed for everyday use.

## HoReCa DETERGENT CHEMICALS

The concentrated professional detergents and disinfectants under **BALU**® trade mark have been developed by our experts for daily cleaning of various premises, for cleaning companies and entities of the HoReCa segment.

## PRODUCTS CONTRACT MANUFACTURING

*Choosing the Company as a client  
means giving preference to the service and quality  
of European standard*

**PRIVATE  
LABEL**

**Ukrainian Chemical Technologies LLC provides contract manufacturing of liquid detergents, disinfectants (consumer chemicals, automotive chemicals, technical cleaning chemicals etc.) within its Private Label framework offering their customers a choice of complex solutions for production assignments at all phases of the manufacturing of chemical products: from terms of reference to serial manufacturing.**

Under the concept contract production, it is accepted to understand "industrial outsourcing" - transfer under the contract of production process. Contract manufacturing is a special production practice, which allows trademark holders, patent holders, product developers and any other companies to place orders for the production of the product at a specialized enterprise with the necessary equipment, technology and qualified staff. Besides, contract manufacturers develop a product to order by themselves, and then begin its industrial production.

We provide contract manufacturing of liquid detergents (household chemicals, autochemistry, disinfectants, technical detergents, etc.) as part of the Private Label direction, we provide customers with the opportunity of complex solution of production tasks at all stages of chemical production - from the technical task till serial production.

Manufacturing of definite components of the final product by the contract manufacturer, allows the customer to reduce market entry dates of products, reduce production costs, save staff and financial resources, improve the quality of own products with using advanced technologies. Only contract manufacturers, which have a strong technical base, production experience and a sufficient number of qualified staff, can guarantee ensure the full production cycle of liquid detergents.

## PARTNERS

# AWE

### HYGIENE EQUIPMENT

AWE firm's products comply with the latest technical trends and are designed for washing, disinfection, sterilization, drying.

# CleanAccess

### CENTRALIZED CLEANING SYSTEMS

Functions:

- pre-rinsing;
- foam cleaning;
- interim rinsing;
- application of disinfectants.

### PROFESSIONAL CLEANING UTENSILS

Salmon Hygiene Technology professional manual utensils are used in Europe by such leading producers as Coca-Cola, PepsiCo, TetraPak, Nestle, Danone, Nivea and many others.

### DOSING EQUIPMENT

- Simple mechanical dozers.
  - Automatic dosing systems.
  - Measuring devices for dosing control.
- Fully programmable dosing systems provide a recording of all production operations completed.

All equipment meets EU requirements
